Re: 2010300018 – Winnebago County
Interstate Pollution Control – Rockford, Illinois
Notification of Five Year Review Process Start
Superfund / Technical Reports

Dear Mr. Caine:

This letter is to confirm that the Illinois Environmental Protection Agency (Illinois EPA or Agency) is beginning the process of the Five Year Review for the Interstate Pollution Control Site (IPC) in Rockford, Illinois. The Illinois EPA will lead this Five Year Review at this State-lead site with assistance from U.S. EPA. A Statutory Five Year Review will be conducted at the site as required by Section §121 of CERCLA, as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA). The purpose of this review is to evaluate the remedy implemented at the site to determine if the remedy remains protective of human health and the environment.

The Five Year Review of the IPC site is due on March 11, 2016. Since there are a number of topics to be covered in the Five Year Review, it is appropriate that the Illinois EPA and EPA provide the key parties appropriate notification so that we can begin the necessary coordination activities. The necessary activities include such matters as notifying the public of the Five Year Review process and accepting public input, gathering data in order to summarize performance of site hazardous substances and key contaminant containment and treatment devices, arrange for site visits and inspections to review remediation and operation and maintenance functions, as well as develop any pertinent site related recommendations. Illinois EPA will be contacting you to schedule a site inspection and coordinating with our community relations unit to notify the public of this review.
